Luna Zhu

SENIOR PRODUCT MANAGER · AI PRODUCT STRATEGY · PRICING & MONETIZATION

Seattle, WA | (+1) 323-610-3358 | luna.x.zhu@gmail.com | luna-zhu.com | LinkedIn

SUMMARY

Senior Product Manager at Amazon, ex-AWS, with 11+ years of experience spanning product strategy, cloud infrastructure, and monetization. Builds AI-enabled products and monetization strategies across GenAI commerce, ML-powered experiences, and cloud infrastructure. Connects customer behavior, technical tradeoffs, and unit economics to drive better product decisions and profitable growth.

Core Expertise: 0-to-1 Product Strategy | GenAI & ML Products | Customer Research & Experimentation
Pricing & Monetization | GTM | Product Analytics & Unit Economics

PROFESSIONAL EXPERIENCE

Amazon Retail — Seattle, WA
Senior Product Manager — 02/2025 – Present

- Led **0-to-1 GenAI Virtual Try-On (VTO)** strategy and Figma UX prototyping across 5+ cross-functional teams; used customer research, historical adoption data, and 13 competitor benchmarks to prioritize the MVP and exclude a lower-value, high-friction custom avatars feature.
- Defined success and return-rate guardrails; tested VTO through a large-scale Weblab A/B experiment and jointly paused broader rollout with senior leadership when elevated returns exposed fit-accuracy gaps.
- Partnered with Applied Science to evaluate GenAI models across image realism, generation latency, scalability, development speed, and infrastructure cost, guiding selection of an open-source approach for early customer validation.
- Diagnosed a **100–200 bps sizing-related return-rate gap** among China FBA sellers after normalizing for category mix; traced the gap to inconsistent garment measurements and size mappings through SQL analysis, seller interviews, and ASIN audits, then defined requirements for an ML-based size-mapping solution.
- Drove alignment across senior leadership, U.S. Tech, and China business teams to prioritize the previously deprioritized sizing issue; launched a top-seller pilot to establish a path toward broader U.S. rollout and potential international expansion.

Amazon Web Services (AWS) — Seattle, WA
Finance Strategy Manager | Product Economics & Monetization — 06/2021 – 02/2025

- Owned pricing, monetization, portfolio economics, P&L, and margin strategy for AWS Application Performance Monitoring (APM) services; partnered directly with the GM on portfolio and investment decisions.
- Shaped roadmap, pricing, packaging, and GTM strategy for a new billion-dollar-scale observability product; built foundational business case through customer interviews, competitive TCO research, usage analysis, and price elasticity modeling.
- Partnered with Engineering and Applied Science teams on compute, storage, indexing, and data-transfer choices, translating architecture tradeoffs into customer performance and unit economics; helped achieve a **100+ bps gross-margin improvement**.
- Led APM pricing strategy with Product, Sales, Legal, Finance, and Economics; repriced a **$50M annual-revenue service**, increasing gross margin by **30+ percentage points**.

Internet Brands — Los Angeles, CA
Senior Financial Analyst / Business Partner | SaaS — 08/2017 – 05/2021

- Led pricing, customer segmentation, and lifecycle performance management for a $20M ARR SaaS business as a product and finance partner.
- Achieved **10% ARR growth** through bundling, upsell, and cross-sell monetization and **50% lead-to-paid conversion improvement** through digital funnel optimization.
- Built Salesforce and Tableau dashboards tracking activation, churn, and revenue, cutting reporting time from 10 days to 4.

R.R. Donnelley (NYSE: RRD) — Los Angeles, CA
Pricing Analyst — 08/2015 – 08/2017

- Built pricing models and scenario simulations for deal profitability; analyzed customer purchasing trends in Oracle Database.
