

Luna Zhu

STRATEGIC FINANCE · AI PRODUCT ECONOMICS · PRICING & MONETIZATION

(+1) 323-610-3358 | luna.x.zhu@gmail.com

SUMMARY

Strategic finance and product economics leader with 11+ years of experience across AI products, cloud infrastructure, and SaaS. At Amazon and AWS, led pricing, monetization, unit economics, margin improvement, and investment initiatives for products with billion-dollar revenue potential. Combines financial rigor with technical fluency to translate customer usage, infrastructure costs, and product tradeoffs into scalable growth strategies.

Core Expertise: AI product economics | Usage-based pricing | Infrastructure cost modeling | Pricing and monetization | Gross-margin optimization | Scenario analysis | SaaS metrics

PROFESSIONAL EXPERIENCE

Amazon Retail

Seattle, WA

Senior Product Manager

02/2025 – Present

- Led the 0-to-1 strategy and Figma UX prototyping for a GenAI Virtual Try-On (VTO) experience to reduce online purchase hesitation and de-scoping lower-value features such as custom avatars through benchmarking of 13 competing offerings, customer research, and historical VTO adoption data.
- Defined success and guardrail metrics and validated the end-to-end VTO experience through a Weblab A/B test across 500K+ customers; made the strategic call with L8/L10 leadership to pause full rollout after identifying an elevated return-rate guardrail risk due to fit-accuracy gaps, safeguarding long-term unit economics and fulfillment COGS.
- Partnered with Applied Science to evaluate GenAI model approaches across image realism, generation latency, scalability, development speed, and infrastructure cost, contributing to the selection of an open-source approach for early customer validation.
- Identified a 100–200 bps sizing-related return gap across 30K+ China FBA sellers after normalizing for category mix, quantifying 100M+ excess annual return units and \$200M–\$500M in associated fulfillment cost.
- Combined SQL analysis, seller interviews, ASIN-level audits, and GB/T vs. ASTM sizing research to trace the gap to inconsistent garment measurements and size mappings, then translated those insights into requirements for an ML-based size-mapping solution.
- Aligned L8 leadership, U.S. Tech, and China business teams to move a previously deprioritized sizing problem onto the roadmap; launched a top-seller pilot that improved sizing-data coverage and seller adoption while reducing returns, establishing a scalable foundation for broader U.S. rollout and future international expansion.

Amazon Web Services (AWS)

Seattle, WA

Finance Strategy Manager | Product Economics & Monetization

06/2021 – 02/2025

- Partnered directly with the L8 GM for AWS Application Performance Monitoring to drive portfolio strategy across pricing, monetization, P&L, investment planning, and margin optimization.
- Defined the early product roadmap, pricing, and GTM strategy for a new AWS observability product projected to generate \$1B+ over five years, translating customer interviews, competitive research, usage analysis, and elasticity modeling into feature priorities, pricing, and packaging decisions.
- Partnered with Engineering and Applied Science to evaluate architecture tradeoffs across compute, storage, indexing and data transfer, translating infrastructure choices into performance and unit-economic implications, improving gross margin by 100+ bps.
- Owned pricing strategy across the APM portfolio, defining pricing models, discount structures, and contract economics with Product, Sales, Finance, Legal, and Economics; repriced a \$50M annual-revenue service and increased gross margin by 30+ percentage points.

Internet Brands

Los Angeles, CA

Senior Financial Analyst / Business Partner | SaaS

08/2017 – 05/2021

- Served as product and finance partner for a \$20M ARR SaaS business, leading pricing, segmentation, and performance management across the customer lifecycle.
- Increased ARR by 10% through bundling, upsell, and cross-sell monetization models; improved lead-to-paid conversion by 50% through digital funnel optimization.
- Built Salesforce and Tableau dashboards for activation, churn, and revenue, cutting reporting time from 10 days to 4.

R.R. Donnelley (NYSE: RRD)

Los Angeles, CA

Pricing Analyst

08/2015 – 08/2017

- Built statistical pricing models and scenario simulations to optimize deal profitability; analyzed customer purchasing trends in Oracle Database to inform pricing strategy.

EDUCATION & CREDENTIALS

Master of Public Policy | University of Southern California (Dean's Merit Scholarship)

2015

B.A. Economics | Fudan University

2013

Certifications & Bootcamps: CFA Charterholder (2021) | AWS Certified AI Practitioner (2026) | AWS Certified Solutions Architect – Associate (2024) | Product Manager Accelerator Boot Camp (2024)
